RENOLIT Worms location certified

Worms, 17. June 2009 – Since April 2009 the **RENOLIT AG** site in Worms has been fully certified in accordance with the quality-management system under DIN EN ISO 9001:2008. As part of the overall certification process, TÜV Süd Management Service GmbH confirmed that internal workflows fulfil the high standards of the ISO norm. This means that the assured quality of films from the **RENOLIT CONTACT**, **RENOLIT DESIGN**, **RENOLIT EXTERIOR** and **RENOLIT PROFESSION** Business Units is equally transparent and checkable. Previously this standard applied exclusively to the **RENOLIT EXTERIOR** Business Unit.

“Our efforts to achieve this certification have been worth it. My thanks go to all my colleagues who have been engaged so actively on this project”, says Manuela Auer, the Head of Corporate Quality Management who coordinated the audit. “On the one hand we have successfully demonstrated that our products and services meet the high ISO quality standards. On the other, the project has enabled us to optimise internal workflows even further and to make them measurable”, continues Manuela Auer.

The process-oriented quality-management system controls the processes for all products and services via transparent and clearly structured sequences. Regular internal audits involving all staff at the site ensure that this high quality standard is not only maintained but constantly developed further in the interests of customer satisfaction.

The company

The **RENOLIT** Group is an international leader in the manufacture of high-quality plastic films and related products for technical applications. This independent family-run business, which has been setting benchmarks for quality and innovation for over 60 years, now employs a workforce of approximately 4,200 employees at 21 production sites and 16 sales companies. The

RENOLIT brand enjoys a worldwide reputation for technical expertise, modern product design and customer-orientated service.
